

# Letter of thanks

I am writing to express my feelings and thanks for study in the Technion as an exchange student from Beijing Jiaotong University.

During last semester, I learned a lot and made many friends from all over the world. It is really an unforgettable and meaningful experience for me to study and living in the Technion.

First of all, I learned the difference in teaching methods and the way to utilize some useful tools on the computer. The patience and excitement of teachers in the class left deep impression on me. The lectures were always attractive and teachers gave more opportunity to students for discussion. After class, tutors also gave me lots of help both on study and my routine life.

Secondly, the TISUN group is truly helpful. They organized lots of interesting events and journeys, which relaxed me a lot and let me know more friends and knowledge. The series of lectures about Israel and Middle East, in which I learned many Israeli culture and religion, was really a feast of knowledge.

Thirdly, I had a buddy from the buddy group. We went to have fun in a house warming party, drinking in a pub in the Germany Colony as well. He is the first friend I made in Israel, who gave me some useful information.

In the end, I want to say thank you to the person who had ever helped me. And I believe, the Technion, with its highly enjoyed reputation among the world and disseminate from students like me, will have a long lasting friendship and corporation with China and our university.
